Art Unit: 1626

DETAILED ACTION

Claims 1-11 are pending in the application.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7 and 11 (in part), drawn to compounds of formulae I and II where Y is -NR3-.

Group II, claim(s) 1-7 and 11 (in part), drawn to compounds of formulae I and

II where Y is

and q and r are each 2.

Group III, claim(s) 1-7 and 11 (in part), drawn to compounds of formulae I and II not covered in Groups I-II.

Group IV, claim(s) 8-9, drawn to methods of using compounds of Group I. NOTE: Claims 8-9 are presently use claims and the Examiner has assumed that these claims are directed to methods. See MPEP 2173.05(q).

Group V, claim(s) 8-9, drawn to methods of using compounds of Group II. NOTE: Claims 8-9 are presently use claims and the Examiner has assumed that these claims are directed to methods. See MPEP 2173.05(q).

Group VI, claim(s) 8-9, drawn to methods of using compounds of Group III. NOTE: Claims 8-9 are presently use claims and the Examiner has assumed that these claims are directed to methods. See MPEP 2173.05(q).

Group VII, claim(s) 10, drawn to methods of preparing compounds of Group I.

Group VIII, claim(s) 10, drawn to methods of preparing compounds of Group II.

Group IX, claim(s) 10, drawn to methods of preparing compounds of Group III.

The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack

Application/Control Number: 10/585,615

Art Unit: 1626

the same or corresponding special technical features for the following reasons: Groups I-IX lack unity of invention because even though the inventions of these groups require the technical feature of a pyrrolidine ring substituted by a ring moiety at the 3-position and a nitrogen containing group at the 1-position, this technical feature is not a special technical feature as it does not make a contribution over the prior art in view of U.S. Patent No. 6,605,623 by Ko et al., which teaches compounds having the instant structural pattern.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Rejoinder

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a

Art Unit: 1626

nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

Page 4

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew P. Coughlin whose telephone number is (571)270-1311. The examiner can normally be reached on Monday through Thursday from 7:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph McKane can be reached on 571-272-0699. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
